I. READING

The Tower of London is an ancient Norman stone fortress in London. It stands on the bank of the River Thames. It was built by William the Conqueror in the early 1080s to protect and control the city. Since then the Tower of London has been a fortress, a palace and a prison - the scene of murders, executions and pageantries.

Now it is one of London's most famous sights. Nearly two million people visit it every year. Tourists can see:

- The Crown Jewels collection, which includes the world's most famous diamonds. It is on show in a modern specially built room.
- The suit of armour belonging to King Henry VIII, on view in the Tudor Room.
- The exhibition, which gives details of some famous prisoners who were killed in the Garden Tower.
- The Beefeaters, who guard the Tower and give guided tours.
- The Ravens. These black birds first came to The Tower of London in the 14th century. They are taken care of by the staff who work there. The ravens' wing feathers are kept short so they cannot fly away. This is because a legend says that if the ravens leave the Tower, the Tower and the Kingdom will fall.

1. The Tower of London was built

- A) by ancient Romans
- B) to protect London
- C) more than 900 years ago
- D) by the Norman king
